## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embodiment of the drive including a secondary temperature sensor operatively connected to a control unit that is rotatably arranged in a chamber of a drum using roller bearings as suggested by claims 29 and 30 and the embodiment including secondary temperature sensors operatively connected to a control unit comprising a piston and cylinder actuator as suggested by claim 20 must be shown or the feature(s) canceled from the claim(s). Also the control unit including elements 38,39 for the second embodiment as suggested by claims 23 and 28-31. Examiner notes that the control unit in the second embodiment was described in the specification as including element 51. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

2. Claims 12-17, 21, and 22 are objected to because of the following informalities: the phrase "the separating wall" in line 8 from the bottom of claim 12 lacks proper antecedent basis. It appears that the claim should recite --the separating member--. The remaining claims are objected to due to their dependency from claim 12. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 29-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The disclosure fails to provide support for the embodiment of the drive

Art Unit: 3683

including secondary temperature sensors operatively connected to a control unit that is rotatably arranged in a chamber of a drum using roller bearings as suggested by claims 29 and 30 and the embodiment including secondary temperature sensors operatively connected to a control unit comprising a piston and cylinder actuator as suggested by claim 31.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 29-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re: claim 29. The phrase "the chamber" in line 3 is indefinite since it is unclear as to which chamber Applicant intends to refer to (the chamber of the drum or the working chamber).

The remaining claims are indefinite due to their dependency from claim 29.

***Allowable Subject Matter***

7. Claims 12-17, 21, and 22 are objected to as set forth above in the Office action.

8. Claims 23-28, 32, and 33 are allowed. The amendments filed 3/29/06 regarding the bias of the spring member and the opening and closing of the at least one second opening overcome the prior art of record.

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
